GENERAL REQUIREMENTS FOR STUDENTS MATRICULATING IN ACADEMIC YEAR: 2017-2018

DEGREE: BACHELOR OF SCIENCE

MAJOR: MATHEMATICS

MINIMUM CUMULATIVE GRADE POINT AVERAGE: 2.0

MINIMUM MAJOR GRADE POINT AVERAGE: 2.0

TOTAL CREDITS: 120

Note: If a student earns a C or better in MATH 1310, the student does not have to take MATH 1210. However, the student will be required to take an additional math course.

Math Electives 1 – 5 courses

These courses must be at the 3000 level or above. At least two must be at the 4000 level. The Senior Seminar (Math 3980-3990) may count as one 4000 level course. At most one of Math 2240 (Introduction to Applied Mathematics) or Math 2170 (Discrete Mathematics) may be substituted for a 3000 level course.

Students may not receive credit for both 2240 and 4240. All electives must be regularly offered mathematics courses (not reading courses) carrying at least 3 credit hours each.

Year-long Senior Seminar or Honors Project

NDA

Study Abroad: Budapest, Moscow, Germany

CRDV 1090 – Majors, Internships, and Jobs – (1 credit)

This course is not a requirement for this major! It is an option for students who are interested in career development.

Through this course students develop the necessary tools, skills, and resources to become career ready, learning what it takes to be an excellent candidate in today’s competitive job market. While taking CRDV 1090 students will create and refine professional documents, explore careers, conduct job/internship searches, develop networking and interviewing skills, and learn to utilize professional social media in order to network more effectively. Students will learn about the job/internship search process and know how to actively use this information in the real world.

Students will have the unique opportunity to take personality and strength assessments in order to learn about their talents, interests, and preferred work environments. Students participate in a Mock Interview event with professionals.

Note: The Degree Plan and other information provided in this booklet serve only as advising tools. Newcomb-Tulane College advisors will help advise you on the core curriculum, decide on a major, and consult on any academic success issues.

Your major advisors will advise you on major requirements.

Students with multiple majors will have more than one advisor and will need to consult with the appropriate advisor.

Minors are not assigned an advisor, but a faculty member in the department is designated to advise minors.

Become familiar with your major! By declaring early, you have access to a major advisor, are able to enroll in “majors only” classes, and are included in list serves that allow you to receive information about events, internships, and other opportunities.

Pre-med and Pre-law students should also consult with one of the Pre-Professional advisors.
What Can I Do with a Major in... Mathematics

GENERAL INFORMATION
- Mathematics majors develop transferable skills including critical thinking, problem diagnosis and solving, computer skills, and quantitative skills.
- For a wider variety of career options, pair a mathematics degree with another technical discipline such as computer science or engineering.
- Gaining relevant work experience through internships, practica, part-time jobs, or volunteer positions is critical.
- To maximize your employability, develop practical skills such as computer expertise, written and verbal communication and project management and supplement your curriculum with courses in business, economics or social sciences.
- Maintain a high GPA. Demonstrate attention to detail and commitment to accuracy.
- Join related student organizations and seek leadership positions.
- Develop the ability to work well on teams.
- Note that the greatest demand is for applied mathematicians with skills in computer science, electronics design and theory, statistics and probability.

SKILLS
- High proficiency in written/oral communications
- Ability to analyze problems/make appropriate decisions
- Ability to organize and think logically
- Ability to deal with numbers
- Ability to write/edit
- Ability to conduct/explain scientific research

MARTKET RESEARCH
- Data Collection
- Information Analysis

PRIVATE INDUSTRY
- Research
- Design
- Testing
- Quality Control
- Statistical Processing Control
- Development
- Data Processing
- Operations
- Consulting
- Environmental Analysis

GOVERNMENT
- Research
- Administration

COMPUTERS/TECHNOLOGY
- Programming
- Applications
- Data Processing
- Software Development
- Hardware
- Systems
- Systems Analysis
- Information Systems
- Networking
- Training

EMPLOYERS
- Market research firms
- Consumer goods manufacturers
- Industries including: manufacturing, transportation, aerospace, communications, pharmaceutical, technology
- Consulting firms
- Federal agencies including the Departments of Defense, Labor, Justice, Agriculture, Health and Human Services, Transportation, Commerce, Treasury and Library of Congress
- State agencies involving research and problem solving
- Manufacturing firms
- Government
- Financial Institutions
- Service companies
- Consulting firms
- Computer hardware and software firms

If you think you might be interested in this major, but you are not absolutely sure, an exploratory advisor can help you explore major and career options, please go to: Explore.Tulane.edu
